

Supply Chain Sustainability

Our commitment

Portland General Electric is committed to providing our customers with reliable, reasonably priced electricity. We seek solutions that reduce environmental impacts from our operations, ensure the safety and health of our employees, contribute to the well-being of our communities, and build value for our shareholders and customers.

Our suppliers and contractors are an integral part of PGE's sustainability efforts. We view sustainability as a long-term approach to business planning and decision-making that balances our economic, environmental and social responsibilities.

Because our decisions affect our customers, employees, shareholders, suppliers and communities, we commit to using this balanced approach in our business decision-making processes.
